

Python Full Stack Developer – Job Description

We are looking for a **highly skilled Python Full Stack Developer** to join our dynamic development team. The ideal candidate will be responsible for designing, developing, and maintaining scalable web applications using Python-based frameworks along with modern front-end technologies. You will collaborate with cross-functional teams to deliver high-quality, performance-driven solutions that meet business requirements.

Key Responsibilities

- Design, develop, and maintain **full-stack web applications** using Python frameworks such as **Django, Flask, or FastAPI**.
- Build responsive and user-friendly front-end interfaces using **HTML5, CSS3, JavaScript, React, Angular, or Vue.js**.
- Develop and integrate **RESTful APIs** and third-party services.
- Design and manage **database structures** using SQL and NoSQL technologies (PostgreSQL, MySQL, MongoDB).
- Implement authentication, authorization, and security best practices.
- Write clean, scalable, and well-documented code following software development standards.
- Optimize applications for **maximum speed, scalability, and reliability**.
- Collaborate with UI/UX designers, product managers, and other developers to implement new features.
- Perform **code reviews, debugging, and troubleshooting** to improve system performance.
- Manage version control using **Git** and follow CI/CD practices for deployment.

Required Skills & Qualifications

- Bachelor's degree in **Computer Science, Information Technology, or related field**.
- **3+ years of experience** in full stack development with Python.
- Strong proficiency in **Python programming** and backend frameworks (Django / Flask / FastAPI).
- Solid understanding of **front-end technologies** (JavaScript, React, HTML, CSS).
- Experience with **REST APIs, microservices architecture, and API integrations**.
- Knowledge of **database design and ORM frameworks**.
- Experience with **Docker, cloud platforms (AWS, Azure, or GCP)** is a plus.
- Strong problem-solving skills and ability to work in an **Agile development environment**.

Preferred Qualifications

- Experience with **DevOps tools and CI/CD pipelines**.
- Knowledge of **Redis, Celery, or message queues**.
- Familiarity with **testing frameworks (PyTest, UnitTest)**.
- Experience building **scalable enterprise applications**.

Key Competencies

- Strong analytical and debugging skills
- Excellent communication and teamwork
- Ability to handle multiple tasks in a fast-paced environment
- Passion for learning new technologies and frameworks
