LETTER OF RECOMMENDATION

I am writing this letter in enthusiastic support of **Mr. YENUMULA LOKA DURGA SAI SURYA's** application for the graduate program at your University. As his professor at GITAM, VISAKHAPATNAM, I have had the opportunity to assess him based on his participation in class, completion of assignments, and success on final semester exams. Mr. Surya, one of the most talented students in his class, is ambitious, tenacious, and sincere in all of his endeavors.

Mr. Surya and I have been working together for three years. Being an engineering student, he showed a significant interest in the actual application of the abilities taught from the start and gradually harnessed it. This impressed me greatly. He always approaches his work with dedication, grit, and sincerity.

During the **"FINITE AUTOMATA AND FORMAL LANGUAGE"** class, I got to know him. He has demonstrated a strong interest in discovering the lab procedures employed in the course. Following that, I began to see him asking inquiries about ideas covered in class. It was more engaged and enjoyable because of our exchanges with him during the session. He accepts the criticism and views it as a form of education. He strikes me as a really motivated and committed learner. He finds learning to be fun. He possesses the uncommon and valuable quality of being a team player who can work well with all of his colleagues.

Additionally, he has consistently outperformed others in conceptual comprehension and application. Along with his internship, he also worked on a machine learning project. His distinctiveness came from how he used the things he acquired while working on projects and internships. He proceeded to develop his knowledge and abilities.

I can certainly say that he can do any assignment allocated to him with dedication and bring honor to the institute where he studies because I knew him as a student about whom mentors could be proud. I thus wholeheartedly suggest him for enrollment at your university and wish him well in his future endeavors.

Yours sincerely,

(P. Chandra Sekhar)
